LZ-271

The color of the JUKI LZ-271 embroidering machine has been changed to a modern, bright urban white, thereby realizing a fresh appearance.

It is capable of running at a sewing speed of 2,000 sti/min with a consistent sewing performance.

The zigzag width can be as large as 12mm.

Highly durable components are used as the machines major parts, thereby realizing smooth running at high speed with minimal machine vibration. This sewing machine is highly evaluated by the embroidering industry.

LZ-271

FEATURES

1. Beautifully finished seams and a wide range of applications.

This machine can be used for extra light-weight materials including lawn and organdy, medium-weight materials including those used for blouses and handkerchieves, and heavy-weight materials on which names and labels are to be embroidered. Beautifully finished seams free from needle swaying or material breakage are assured every time.

2. The zigzag width can be as large as 12 mm.

The zigzag width is regulated up to 12 mm using the knee lifter. This knee lifter has been designed to fit the jut-type knee lifter widely used by zigzag stitch machines.

Using the jut-type knee lifter with the zigzag width pointer released

3. Consistent, fine-quality seams.

Highly durable and reliable components are used as its major parts, including the needle bar oscillating mechanism, thereby leading to smooth running without vibration even at high speed, the result of which is consistent, high-quality seams.

SPECIFICATIONS

| | |
|---------------------------------------|--|
| Applications | Embroidering on light-, medium- and heavy-weight materials |
| Sewing speed | Max. 2,000 sti/min* (with a zigzag width is as large as 10 mm) Normal 1,700 sti/min* (with a zigzag width is as large as 12 mm) |
| Needlebar stroke | 33.4 mm |
| Needle | DB x 1 #9 through #18 (standard : #11) |
| Zigzag width | 0 ~ 12mm |
| Zigzag width regulating method | Using the jut-type knee lifter with the zigzag width pointer released. |
| Hook | DB-type hook for embroidering |
| Lubrication method | Centralized lubrication (using an oiler) |
| Material handling area on the machine | 270 mm (from the needle entry to the bottom of the arm) |

* "sti/min" stands for "Stitches per Minute."

Installing the attachments (Optional)

A compass and cord embroidering attachment can be installed on the machine.

The compass (asm.) (B3352-271-0A0) and scallop (asm.) (B5001-271-0A0) can be ordered from us as options.

JUKI CORPORATION HEAD OFFICE

Juki Corporation operates an environmental management system to promote and conduct the following as the company engages in the research, development, design, sales, distribution, and maintenance of industrial sewing machines, household sewing machines, industrial robots, etc., and in the provision of sales and maintenance services for data entry systems:

- ① The development of products and engineering processes that are safe to the environment
- ② Green procurement and green purchasing
- ③ Energy conservation (reduction in carbon-dioxide emissions)
- ④ Resource saving (reduction of papers purchased, etc.)
- ⑤ Reduction and recycling of waste
- ⑥ Improvement of logistics efficiency (modal shift and improvement of packaging, packing, etc.)

To order, please contact your nearest JUKI distributor.
